

EQUALIZER[®] SP

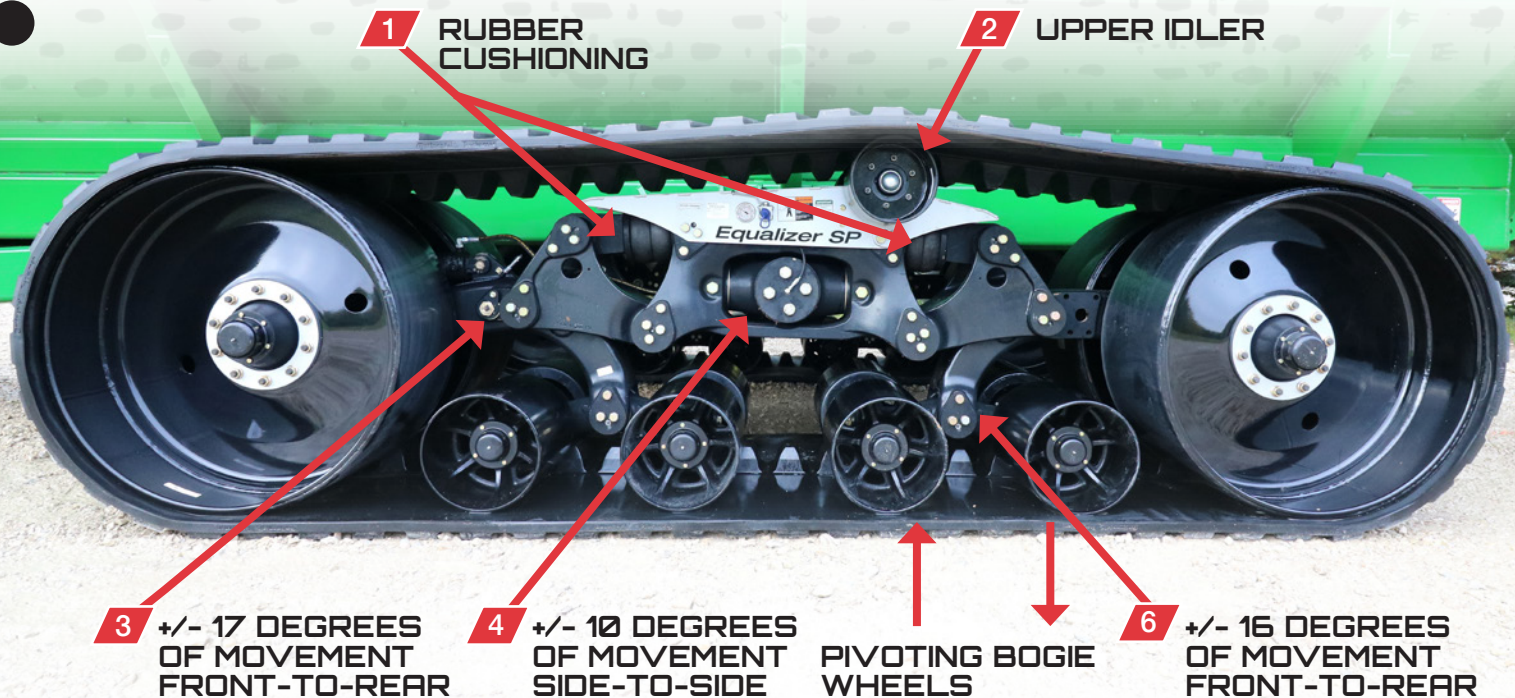

TRACK SYSTEM

When you're seeking the ultimate flotation for your 2,000 plus bushel capacity Brent and Unverferth grain carts, look to the **NEW EQUALIZER[®] SP** track system that literally takes flotation to the next level.

It features the patented cambering action of the Equalizer track for up to 10 degrees of side-to-side movement and 17 degrees of front-to-back pivoting for hugging the ground.

EQUALIZER® SP TRACK SYSTEM

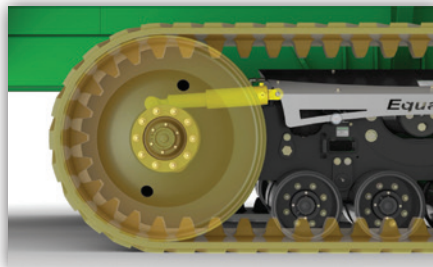

Extra-wide one-piece track belt

- Extra-wide 50" x 172" track belt with one-piece molding for longer life provides 88.6 square feet of track on the ground
- Patent-pending laterally-mounted suspension design provides a smoother ride over rough terrain and enhances component life with less shock transferred to the cart for increased life

Hydraulic tensioning

- Upper idler wheel keeps belt properly positioned throughout the various track movements for longer belt life and reduced maintenance
- In addition to the main trunnion pivot, each of the individual bogie wheels also pivot from front to back and side-to-side to maximize ground contact for virtually the entire track length for ultimate flotation and stability

Standard auto-greaser

- Hydraulic tensioning for quick and easy adjustment to 1,250 pounds and includes hydraulic hose to pressurize using the tractor's hydraulics for in-field adjusting
- Purgeable seals provide optimal bearing lubrication by flushing out contaminants during lubrication
- Standard auto-greaser lubricates pivot points for reduced maintenance
