

FREQUENTLY ASKED QUESTIONS

Q What options are available to add to the Stalk PULLr?

A Front mounted stalk chopper, Rear mounted closing baskets, Gauge wheels

Q Are 28-inch disks still available?

A The 28-inch disks are not available any longer; the standard blade is 24 inches.

Q How much horsepower do I need to pull the machine?

A This machine does not require much horsepower at all. At a minimum we recommend 5 hp per row.

Q How fast should I run this machine?

A As fast as you can pull it and keep consistent ground contact. 10-12 mph is generally recommended.

Q When do I need to replace bushings?

A When the row unit starts to get abnormal amounts of play in them side to side, it is probably time to consider replacement.
