PARKER® HI-CAPACITY GRAIN WAGONS

The Parker Five-Series Grain Wagons

provide you with year after year of
dependable service.

The Tradition Continues

**Parker 505, 605, 705 Hi-Capacity Grain Wagons
(550, 625 and 750-bushel capacities)**

Parker high-capacity grain wagons offer durable construction that will provide you with a dependable and user-friendly way to transport grain. As part of the proud Parker grain handling tradition, we continue to offer you the best equipment for handling your most valuable possession at harvest time.

All Parker five-series grain wagons feature one-piece box construction for strength and durability. Steep side and end slopes with a graphite-coated interior provide quick and complete cleanout. Silicone-sealed seams resist corrosion. Available in your choice of tractor red or green high-quality paint finish.

Additional features and benefits

- 1** All high-capacity grain wagons feature surge brakes, capacity-rated transport chain, LED lighting and an SMV emblem for safer towing.
- 2** Model 505 is equipped with rear surge brakes and are also available with front brakes. Models 605 and 705 have four-wheel brakes for safer control of the heaviest loads. Heavy-duty spindles and hubs ensure years of trouble-free service.
- 3** Tandem towing is easier with the 7-prong electrical receptacle, welded steel hitch and safety chain loop connector. All electrical wiring is mesh-wrapped and routed through conduit for extra protection and longer life.
- 4** The 60-inch unloading door opens easily with the large turning wheel. The metering door can be used for convenient load sampling. The side delivery unloading chute can be converted to a center-dump for pit dumping. Nighttime unloading is easier with the flood lamp directly above the chute.
- 5** Self-locking design on unloading chute for quick and easy operation.
- 6** Nonslip surfaces on the viewing ladder steps make for safer checking of load contents.
- 7** Contoured sill design allows greater maneuverability and up to 40 percent tighter turning radius than traditional wagons.

Options available

- Roll-up tarp for protection of grain during adverse weather conditions
- Protect and ensure a long-lasting, high-quality finish with the available fender package
