MODEL 2054

54-SERIES GRAIN CARTS

LIGHTNING-FAST UNLOADING IN A NEW THUNDEROUS SIZE

Available in 2025, the Parker model 2054 takes the double-auger lineup to the next level with a thunderous 2,000-bushel payload that unloads lightning fast in just two minutes. Its steep-sloped sides ensure complete cleanout, load after load even in wet grain. The pivoting vertical auger design with directional downspout control provides accurate unloading into trucks. A standard rear tank access door with an ergonomic ladder permits easy access to the inside of the tank, and large viewing windows allow for easy checking of the grain level. The 20" horizontal auger is powered by dual belts and the 24" vertical auger by a 90-degree gearbox for reliable unloading. Safety features include high-intensity LED lighting, reflective striping and transport chain. To match your farming operation, all Parker double-auger grain carts are available with a durable finish of red, green or metallic gray.

OPTIONS & ACCESSORIES

UNDERCARRIAGE

Options include in-line tandem dual wheels and tires, 36" wide x 148" long traditional tracks with hydraulic tensioning, 42" or 50" wide x 148" long Equalizer® tracks, or for ultimate flotation, the 50" wide x 172" long Equalizer SP track with side-to-side cambering and independent bogie wheel pivoting. The rubber-belted tracks are built with one-piece molding that bonds the belt and lugs as one for the greatest durability. Equalizer track systems feature an auto-greaser for regular lubrication to minimize daily maintenance. All undercarriage options feature a standard rubber-cushioned hitch for a smooth ride through the field and a hydraulic jack for convenient hookup.

IN-LINE TANDEM DUAL WHEELS

SCALES

The standard 410 scale package features an easy-to-read display for a quick and accurate weight reference. The optional 520 scale package features a full keyboard and auto-log to automatically save each load. The UHarvest® Pro scale system is easy to operate from the tractor's ISOBUS VT screen and tracks grower, farm, field, crop, truck and destination for detailed harvest reporting. This information can be easily uploaded to the Slingshot® cloud via Bluetooth for in-depth reporting capabilities. The "Connections" feature allows the operator to import their grower, farm and field data from the John Deere Operations Center™ directly into the UHarvest Pro system with the click of a button.

520 SCALE PACKAGE

OPTIONS

Choose from a wide range of options and accessories to equip your new 2054 grain cart exactly how you want it. The 5-function joystick controller option allows the operator to control all functions of the grain cart from a convenient handheld pistol grip remote. The water delivery system features a custom 275-gallon tank, Ace 204 hydraulic pump, 100' of hose and firehose-style nozzle. Other options include a rear hitch with 20,000-pound capacity, remote scale display mounted on the side of the grain cart, electric roll tarp operation and color cameras.
