

Fill Augers and Conveyors for CCS Drills and Planters

Sweet dreams!

You'll sleep well this planting season with an Unverferth CCS drill or planter fill. They're the latest innovation from the High IQ line for maximizing planting efficiency for growers with JD CCS planting systems. Bag or bulk seed is easily moved from the ground-level hopper which makes Constantly Climbing Stairs just a distant memory.

Conveniently placed, dual on/off controls and an 8'-telescoping downspout on all models allow for easy, one-person filling of the seedbox from the ground or planter platform.

Models are available for 1690, 1890 and 1990 CCS drills and the 1770, 1790, NT and DB series CCS planters.

Unverferth[®] CCS Drill and Planter Fills

Conveyors

Super-gentle, variable-speed conveyors are 16' x 6" and feature a collapsible hopper and a 6" tube with an 8" cupped and cleated belt for gently unloading up to 12 bushels per minute. The top-mounted motor stays cleaner for longer life and keeps the belt taut for the gentlest seed handling.

The conveyor models for planters feature a gas-spring lift-assist for easy lifting and sliding of the conveyor into

the middle of the planter for transport. Conveyors for drills store across the rear of the drill within its transport height and width, similar to auger models, for enhanced roadway safety.

Bi-folding 18' model for 1770/1790/DB provides ideal unloading height

Rigid models for 1690, 1890 and 1990

Easy one-person operation with pivoting design

Augers

Auger models feature durable, 6" steel-tube construction, three flighting options and an ideal unloading angle for the gentlest seed handling. Cupped-steel and cupped-plastic flighting moves seed at up to 10 bushels per minute. The more-gentle, brush-tip auger transports seed at 8 bushels per minute.

The well-balanced design allows for easy raising and lowering and features a swivel mount for effortless positioning of the hopper at filling. The auger is easily locked into the storage position on the stowage cradle.

High-output 6-cubic-inch motor is top mounted for longer life.

Auger and conveyor hoppers are fitted with flip-over hopper lids for minimizing debris accumulation during planting, transport and storage. A clean-out door is standard for easily removing leftover seed when switching varieties.

CCS drill and planter fill specifications

Model	1770/1790/DB	1790 w/ Fert Opt.	1690/1890/1990	
AUGER	Size	6" x 18' bi-fold	6" x 18' bi-fold	15' rigid
	Storage	Rear	Rear	Rear
	Added Transp.	0	0	30" length
CONVEYOR	Size	6" x 16' Rigid	6" x 16' Rigid	6" x 16' Rigid
	Storage	Center	Center	Rear
	Added Transp.	24" length	5" height/48" length	30" length

For planters with rear hitch, refuge or smart box option, please consult your dealer for applicable model availability.
