

NEW FEATURES FOR 2024

UHARVEST® PRO GRAIN CART SCALE SYSTEM

CONNECTING GROWER, FARM & FIELD INFORMATION

New features will be released for the UHarvest® Pro grain cart scale system in late summer 2024. The new UHarvest Pro system will feature the ability to connect your grower, farm and field structure database to another third-party system using "Connections". This will allow you to easily sync your grower, farm and field structure database between the UHarvest Pro grain cart scale system and your John Deere Operations Center™ account.

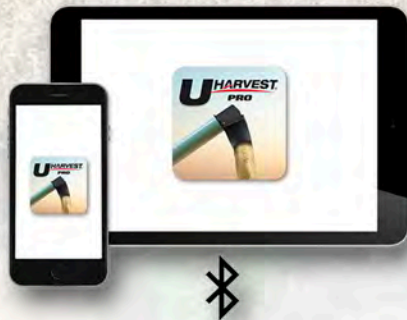

ADVANTAGES

Connecting your UHarvest Pro grower, farm and field structure database to a third-party setup presents numerous time-saving advantages:

1. No need for additional grower, farm and field entry into the UHarvest Pro system after your database is created in the John Deere Operations Center, saving you time during setup.
2. The manual sync button allows the operator to automatically bring changes to your Operations Center database to the UHarvest Pro system as your grower, farm and field structures change. This saves you time, promotes accuracy and continuity between the UHarvest Pro system and John Deere Operations Center.
3. Using the all-new UHarvest Pro mobile App database transfer feature, it's easy to push all grower, farm and field structure changes to every one of the UHarvest Pro-equipped grain carts in your operation.

STREAMLINED SETUP

CONNECT UHARVEST PRO GROWER, FARM & FIELD JOHN DEERE OPERATIONS CENTER™

To connect your UHarvest Pro database to your John Deere Operations Center account, you can simply go to the "Connections" section of the all-new UHarvest Pro app that will be released in late summer 2024. After selecting the third-party database you'd like to connect to, such as the John Deere Operations Center, you will be prompted to enter your login credentials. This will give the UHarvest Pro grain cart scale system access to your grower, farm and field structure in John Deere Operations Center. Now you can sync your database to all applicable UHarvest Pro-equipped grain carts with the UHarvest Pro system installed.

➤➤ For complete details on equipping your grain cart with the UHarvest Pro Scale System, visit UHarvest.net. UHarvest Pro is your complete ISOBUS-operated harvest data solution.
