

# SPRAYER WHEEL SYSTEMS

## PRECISION WHEELS for PEAK SPRAYER PERFORMANCE

Unverferth Manufacturing offers a comprehensive selection of wheel systems and packages engineered for today's top-performing sprayer brands. Whether outfitting for row crop precision or flotation performance, these wheels deliver the strength, versatility, and durability demanded by these high-horsepower workhorses.

All wheels are manufactured to OEM specifications using Grade 80 or A-36 steel discs, heavy-duty rims and are finished with a durable, high-gloss powder coat that seamlessly matches factory equipment performance for maximum durability.

# WHEEL COMPATIBILITY

## JOHN DEERE

Wheels are available for all John Deere self-propelled sprayers, including the 00-, 10-, 20-, and 30-Series, as well as all R-Series machines such as the R4045 and 616R. Options range from 20" to 54" diameters, with 10- or 12-bolt patterns.

## CASE IH

High-clearance and wider flotation wheels are offered for all Case IH self-propelled sprayers from the 10-Series through the 50-Series. Available wheel diameters range from 38" to 54", with both 10- and 12-bolt configurations.

## FENDT & AG-CHEM

Compatible with Fendt and Ag-Chem RoGator Sprayers in Fendt Red or AGCO Corporate Gray colors. Stock number available for Fendt RG900, RG1100, and RG1300 from 38" to 54" diameters in the standard 12-bolt pattern.

## HAGIE STS

Offerings for STS12, STS14, and STS16 models, commonly with 46" wheels featuring a 10-bolt pattern.

## REPLACEMENT & CONVERSION

Most OEM sprayers ship standard with row crop wheels and tires. We offer a wide variety of replacement row crop wheels as well as flotation conversions for all major models.

## CUSTOM WHEELS

Leveraging the latest in computerized design and fabrication technology, Unverferth delivers custom-built sprayer wheels matching your required specs and offers tailored solutions for unique sprayer wheel configurations.

## DUAL WHEEL OPTIONS

Available in 38" to 50" diameters for 20", 22", and 30" row spacings. Each dual setup includes wheels, spacing-specific extensions, and a fixed adapter plate that remains on the machine for quick and easy installation of dual assemblies.

 For custom-built wheels designed to your specifications, contact your nearest dealer today to explore the best solution for your equipment.

 Wheel product distribution available from our Ohio, Georgia, Iowa, Nebraska, Texas, North Dakota, California, Washington, Saskatchewan and Ontario facilities.
